3d Visualizatin & Graphic Design

All the visuals you will see in this presentation are 3D works prepared on the computer. Not real photo

Furniture Modeling and Render;

The importance of images for your products is invaluable. Images are the first thing a customer looks at when reviewing your product. The quality of the product you sell starts with the quality of the image you upload. So, images are an important part of the quality process. It can affect your customer's purchase decision, as well as make them stop buying.

Well-crafted, high-quality images provide information that leaves no room for question-marks in the minds of the customer, protecting you from return orders. The customer first communicates with the image you uploaded, not with you. It appraises you with the visual. Therefore, the images of the products are your brand ambassadors.

Zakarga is a team specialized in 3d visualization and graphic design. Whether you are producing a small coffee table or producing very complex furniture, Zakarga allows you to present your products to your customers in the most understandable way and with great concepts. We visualize your products in the living spaces and studios of your choice. we also prepare 3d technical drawing of the product. If you wish, we can contribute with creative designs so that you can share the 3d images we have prepared on your social media.

While you only focus on production,
Zakarga will prepare the most suitable marketing studies for you.
